

## LED SCHOOL CROSSWALK WARNING SIGNS

These signs are an effective and eye catching variation to standard school crossing signs. This Blinker sign combines highly visible fluorescent yellow green sheeting with bright LEDs around the edge of the sign.

The LED lights in the school crosswalk warning sign increase the sign's visibility range during the day and at night; therefore drivers notice them farther in advance than conventional signs.

Because the LED lights are around the perimeter of the sign, the shape is easily recognizable to motorists as a pentagon shape which indicates a school area.

Blinker signs direct drivers to be prepared to yield to pedestrians sooner; thus improving the safety of students who walk and bike to school.

### 30" DAYLIGHT VISIBLE SCHOOL CROSSING BLINKER SIGN

This unit consists of:

- 30" Daylight visible LED Blinker sign with fluorescent yellow green sheeting
- Solar panel with mounting bracket
- Long life battery Pack
- 24 hour operation

This sign requires no external power because the battery pack is charged by the sun's energy. Installation is simple on a standard sign post (not included). If your site currently has a standard school crossing sign on a post, all you have to do to install this Blinker sign is remove the existing sign and bolt your new blinker sign in its place. Blinker signs are one of the most affordable and effective ways to dramatically enhance school zone safety.

- Solar systems require adequate sunlight. Excessive foliage or shady conditions may affect proper performance of this or any solar device.

**Note: This device requires some assembly and should be installed by a qualified electrician who is comfortable reading and following schematic instructions.**
