WIRELESS, PUSH BUTTON ACTIVATED, SOLAR POWERED, SCHOOL CROSSING BLINKER SIGN SYSTEM

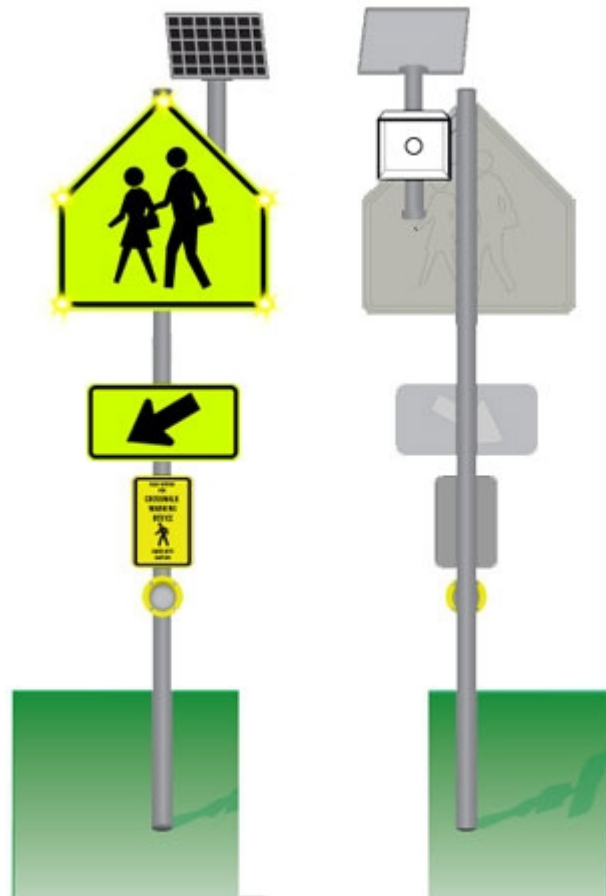

This Wireless Solar Blinker System is an easy, affordable, and effective way to dramatically enhance the safety of a school zone crosswalk.

Wireless push button activation allows pedestrians to push a button when they are ready to cross the street thereby activating bright attention catching LEDs in the face of the signs.

Once activated, the signs will flash for 45 seconds which provides increased warning to motorists and protection for pedestrians to cross.

This system consists of:

- Two 30" Daylight visible LED Blinker signs with fluorescent yellow green sheeting
- Two Solar panels with mounting brackets
- Two long life battery Packs
- Two push buttons
- Two blinkerbeam wireless controllers
- Two 4.5" OD x 12' round posts
- Two Pelco breakaway bases for concrete mounting application
- Theft resistant mounting hardware for signs, controllers, and push buttons
- Solar systems require adequate sunlight. Excessive foliage or shady conditions may affect proper performance of this or any solar device.
- This unit must ship by common carrier.
- Please allow up to 4 weeks for this unit to ship

Please call us if you have additional questions regarding this system. We look forward to working with you on your project.

Note: This device requires some assembly and should be installed by a qualified electrician who is comfortable reading and following schematic instructions.

Product: # SZ4009

Price: \$7095.00 ea.
